

HIGHLIGHTS

- > Profit before tax up 53% to EUR 16.9 (following 11.1) mill
- > Record order backlog as of September 30, 2005 EUR 114.2 (following 39.3) mill, up 190%
- > Bookings 1-9/2005 up 64% to EUR 200.8 (following 122.3) mill
- > Large-scale investment at Ternitz

SCHOELLER-BLECKMANN OILFIELD EQUIPMENT AG

Dear shareholders,

The positive development observed in the first half of the year continued throughout the third quarter of fiscal 2005. Global demand for oil remained high. The price of the WTI (West Texas Intermediate) crude oil fluctuated between USD 56 and 70 per barrel in the third quarter of 2005. This overall environment has had a vigorously stimulating effect on the exploration activities of the international oil companies.

Therefore, demand for oilfield service equipment remained undiminished in the third quarter of the year. Schoeller-Bleckmann already received orders for 2007 in Q3, which is also the reason for the unprecedented order backlog. While this time horizon for orders is rather untypical of our industry, it is an indication that our customers also expect the upward cycle to continue for a long time.

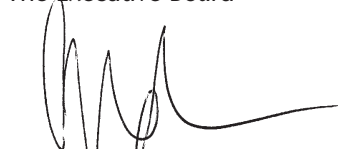

The strong demand was observed in all segments and at all production sites. We are particularly proud of the successful market entry of our new high-performance drilling motor called "Spiro Star" developed by our subsidiary BICO. It was launched only several months ago and has helped us to become the global market leader in this high-tech market niche of high-performance drilling motors.

In order to benefit from the upward tendency as best as possible we decided to initiate the largest ever investment and expansion programme in the company's history for the Ternitz production site. It will be kicked off still this year, will total around EUR 15 million and will be completed early in 2007. The core of the programme is a new forging plant which will double our forging capacity. In the wake of the capacity expansion, the downstream machinery stock will equally be upgraded. As a consequence of the large-scale investment at the Ternitz location Schoeller-Bleckmann Oilfield Equipment will create 20 new jobs for the region. The expansion is a major part of the 100 million Euro strategic investment programme of SBO which is to be implemented within the next two years.

We expect the overall market environment to remain positive for the oilfield service industry in the next months. The current record order backlog worth EUR 114.2 million as of end of September 2005 (following EUR 39.3 mill in September 2004) is the basis of a successful round-off of fiscal 2005 and a promising take-off in 2006. It will be our challenge within the coming months to cover the sustained strong demand for high-precision components by adjusting our production capacities accordingly.

Ternitz, November 2005

Executive Board, CFO

NOTES ON THE NINE-MONTH STATEMENT

In the first nine months of 2005, sales generated by Schoeller-Bleckmann Oilfield Equipment AG went up 10% to EUR 123.9 mill, following EUR 113.0 mill in the same period of 2004. Adjusted for our subsidiary Bafco, which was divested in the first quarter of 2005, sales increased by 12%. Profit before tax climbed from EUR 11.1 mill in the same period of 2004 to EUR 16.9 mill, a 53% rise. The net income generated in the period under review was EUR 12.0 mill, 65% up against the same period of 2004 (EUR 7.3 mill). In terms of earnings per share this is EUR 0.80, calculated for an average of 15 million shares (following EUR 0.56 for 13 million shares in the first nine month of 2004). In the wake of the capital increase the number of shares was increased from 13 million to 16 million shares as of April 1, 2005.

The hurricanes hitting the US impaired the entire oilfield service industry located mainly in the south. Our subsidiaries in Houston had to discontinue production only for several days. Although invoicing was hampered by that downtime in September, SBO's production facilities remained undamaged.

Capex of EUR 13.4 mill (following EUR 7.1 mill in the first nine months of 2004) clearly exceeded last year's volume. They were used to build up the drilling motor and the machinery for manufacturing high-precision components at all sites. Implementation of the capacity expansion will be further intensified in the fourth quarter and will entail an increase of the headcount.

New elections to the Supervisory Board of SBO

Karl Samstag, board member of Privatstiftung zur Verwaltung von Anteilsrechten and former chairman of the executive board of Bank Austria Creditanstalt AG, was elected member of the supervisory board of SBO in an extraordinary general meeting held on October 24. The general meeting also approved of a change of the statutes according to which voting in the general meeting must be subject to the majority provisions under the "Austrian Aktiengesetz" only.

The SBO Share

On September 30, 2005 the closing price of the SBO share, which is represented in the ATX, the index of the volume leaders at the Vienna Stock Exchange, was EUR 27.87, an increase of more than 75% against the closing price at the end of 2004 (EUR 15.81). The rise of the free float following the capital increase was reflected positively in the trading volume of the share. The average daily trading volume in the first nine months of fiscal 2005 (double counting) was 77,222 shares against 24,212 shares in full 2004.
